

Web Dynpro Introduction

Exercise

Chapter: Web Dynpro Introduction

Theme: Create a simple Web Dynpro Application with the SAP NetWeaver Developer Studio

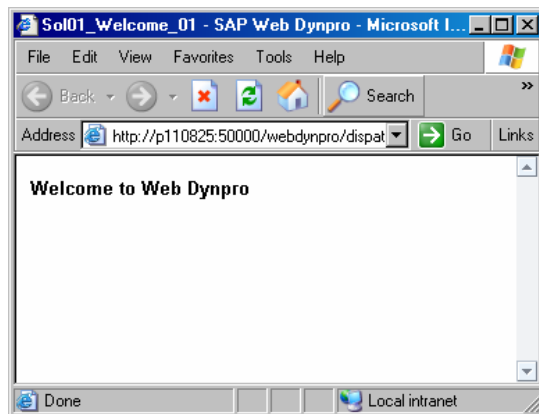

At the end of this Exercise, you are able to:

- Create and run a simple Web Dynpro application using the SAP NetWeaver Developer Studio.

1. Development Objectives

The first exercise is a version of the popular “Hello World” program. You get acquainted with very basic principles in the development process of Web Dynpro applications with the SAP NetWeaver Developer Studio.

2. Result

As a result of this exercise, you should be able to develop, deploy, and run a simple Web Dynpro application as shown on the left side.

3. Prerequisites

You have launched the SAP NetWeaver Developer Studio.

You have selected the Web Dynpro Perspective.

4. Overview: Developing

- 4-1 Create a new Web Dynpro project *WD01_Basics_Introduction*. Use the default project contents.
- 4-2 Create a new Web Dynpro component *Exc_Intro*.
Choose *com.sap.training.wd.basics.intro* as *Component Package*.
Choose *Exc_Intro_Window* as *Window Name* and *StartView* as *View Name*.
- 4-3 Open the View Designer by double clicking on the views name in the Web Dynpro Explorer. A default text is already displayed.
Change some properties of this TextView element (e.g. the properties *design* and *text*).
- 4-4 Create a new Web Dynpro application *WD01_Basics_Introduction* in order to start the component *Exc_Intro_Component*. Use the package name given in part 4-2.

5. Overview: Building, Deploying, and Running

Deploy and run the Web Dynpro application.
