

SAP SOLUTION MANAGER

3. Select the benefits of sap solution manager from the list items below:

- Integration of sap solutions
- Faster ROI
- Lower ROI
- Reduced cost of operations.
- Separation of sap solutions

18. Benefits of SAP solution manager

- More reliable(confiable) IT solutions (1.Minimize risk during implementation 2.- Avoid inconsistencies, 3.- Resolve issues quickly resulting in less down time, 4.- more efficient implementation and change management project)
- Reduce cost of implementation and continuous improvement (1.-Reduce cost of process design technical setup, bussines set up support and operations , testing and knowledge transfer , 2.- Centralized project handling blue printing, configuration and testing, 3.-Reduces the costs of upgrades or continuous improvement projects.

2. The Purpose Of Sap Solution Manager Is To Smoothly Integrate Various Sap Solutions To Achieve Which Of The Following

- Faster issues resolution.
- Faster implementation.
- Faster internet access
- Optimal access to support.
- Optimal support for operations

1. Identify the benefits of sap solution manager:

- More leverage from it investments
- Reduced ROI
- More reliable it solutions
- Faster ROI
- Reduced cost of implementation
- Reduced cost of operation.

15. Why solution manager Faster implementation and more efficient operations of solutions

- Faster issue resolution through collaboration with active global support.
- Optimal support of all operations , maintenace and improvement activitiers
- All available implementation and upgrade content is included
- Optimal access to all support services

25. Elements of the implemetation roadmap

- Roadmap structure.
- Phase
- Viewing text area .
- Attachment area.
- Activity

21. ASAP Methodology

-  Continuous improvement.
-  Business blueprint
-  Final preparation
-  Defined Project preparation
-  Go Live & Support
-  Realization

4. The purpose of asap is to successfully implement sap solutions across multiple industries and customer environments:

- False.
-  True

27. The benefits of the testing features include:

-  Reduce time for test preparation and execution
-  Single point of access to complete system landscape
-  Central storage of testing material and test results
-  Re-use of existing testing material.

22. The purpose of ASAP is to successfully implement SAP solutions across multiple industries and customer environments

- False.
-  True

31. Change Request management provides a central, streamlined approach to managing changes in your system landscapes

- False.
- True

26. Components of the configuration transaction

- Transaction assignments
- Configuration of IMG objects
- Development items
- Project documentation
- Test cases
- Training materials.
- Graphics

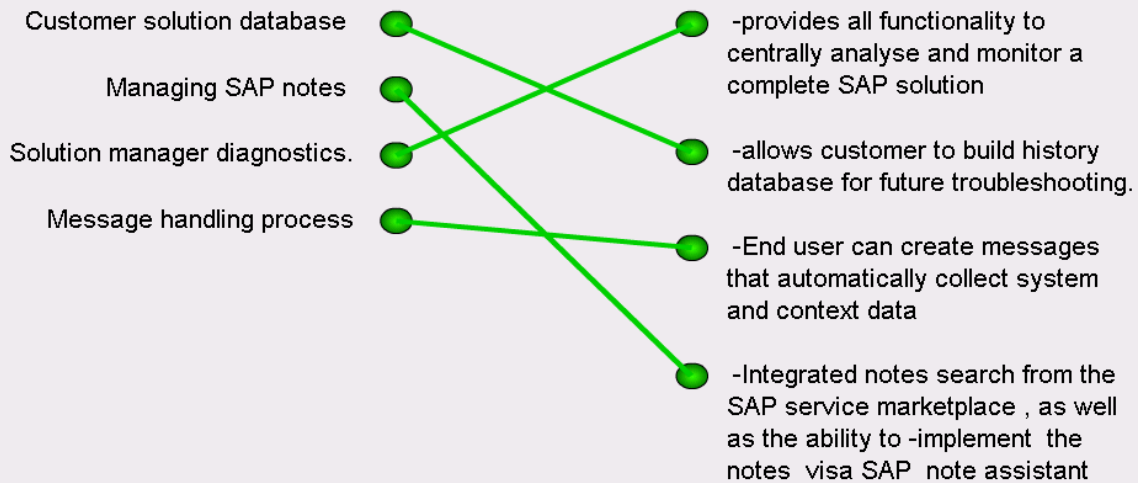

14. Sol Man:

- is an add-industry solution.
- is a stand alone system that communicates with the systems in your landscapes
- Is installed as a part of each of your existing landscape
- is only used for the implementation of your solution

7. The following activities are not part of the project management features of the sap solution manager issues management plan, scope management plan, organizational change management plan.

- True
- False.

30. Match the service desk feature with the correct description of its capability

16. The purpose of the SAP solution manager is to smoothly integrate various SAP solutions to achieve (lograr) which of the following

- ✓ Faster implementation
- Faster internet access
- ✓ Optimal access to support.
- ✓ Faster issue resolution
- ✓ Optimal support for operations

17. Which common usage scenario is missing from the following usage scenarios? Implement SAP solutions, Monitor SAP solutions, Manage Service Desk, Link to SAP services, Upgrade SAP solutions

- ✓ Manage change Requests
- Implement SAP Services.
- Monitor Service Desk
- Link to change Request

19. More benefits of SAP solution manager

- ✓ Reduced cost of operation [Provides central point of control for multi component environments, Facilitates technical and application integration
- ✓ Faster return on investment (ROI) [Accelerates implementation and continuous improvement , Availability of implementation road mas, best practice documents and solution management services speed learning and accelerate project]
- ✓ More leverage from IT investments [integrates with It landscapes that include both SAP and non-SAP, Reduce their total cost ownership without making major changes.

8. Identify the three main areas of the implementation roadmap from the items listed.

- IMG area
- Viewing/ text area
- Roadmap structure
- Attachments area.
- Accelerator area

6. Identify the steps in the asap methodology

- Go live & support
- Realization Project preparation
- Final preparation.
- Roll out
- Business blueprint

20. Identify the benefits of solution manager

- More leverage from It investements
- Reduced cost of implementation
- Reduce ROI
- More reliable IT solutions
- Faster ROI

10. Of the items listed below, which are not features of configuration?

- Generate blueprint
- Transport change requests.
- Test case assignment
- Configure img objects
- Project documentation

12. Change request management provides a central, streamlined approach to managing changes in your system landscapes.

- True
- False.

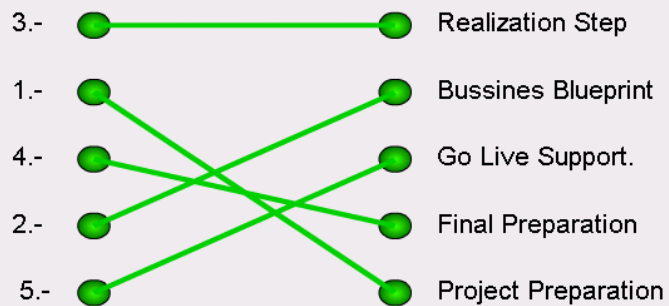

23. Five phases of the implementation Roadmap Project preparation

- Go Live Support.
- Realization Step
- Defined Project preparation
- Continuous improvement.
- Final Preparation
- Business Blueprint

28. Solution monitoring three monitoring sections within the SAP solution manager:

- Business Process monitoring
- System monitoring: central system
- Service level management.

24. Place the ASAP methodology in the correct order by matching the step name to the step number

5. Identify the four main types of roadmaps reviewed.

- Download roadmap
- Upgrade roadmap
- Solution roadmap.
- Solution management roadmap
- Global template roadmap
- Implementation roadmap

13. Navigation structure of roadmaps are:

- Activity
- Accelerators
- Work package
- Phase
- View
- Task

8. Identify the three main areas of the implementation roadmap from the items listed.

- Viewing/ text area
- IMG area
- Attachments area.
- Roadmap structure
- Accelerator area

9. Identify the features of a business blueprint from the following list

- Business scenarios
- Business groups
- Associated items.
- blueprint document
- Blueprint structure
- Business process groups

29. It is not possible to use third party software in your solution monitoring strategy when using solution manager

- True
- False.

25. Features of the bussines blueprint

- BluePrint structure
- Blueprint document.
- Business scenarios
- Associated items
- Bussines process group
