

How to initialize ODS YGTGD046 that failed

Infopackage: Init. package for update by ODS YGTGD046

Error: Processing is overdue

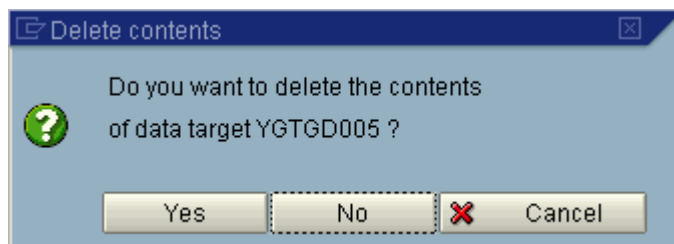

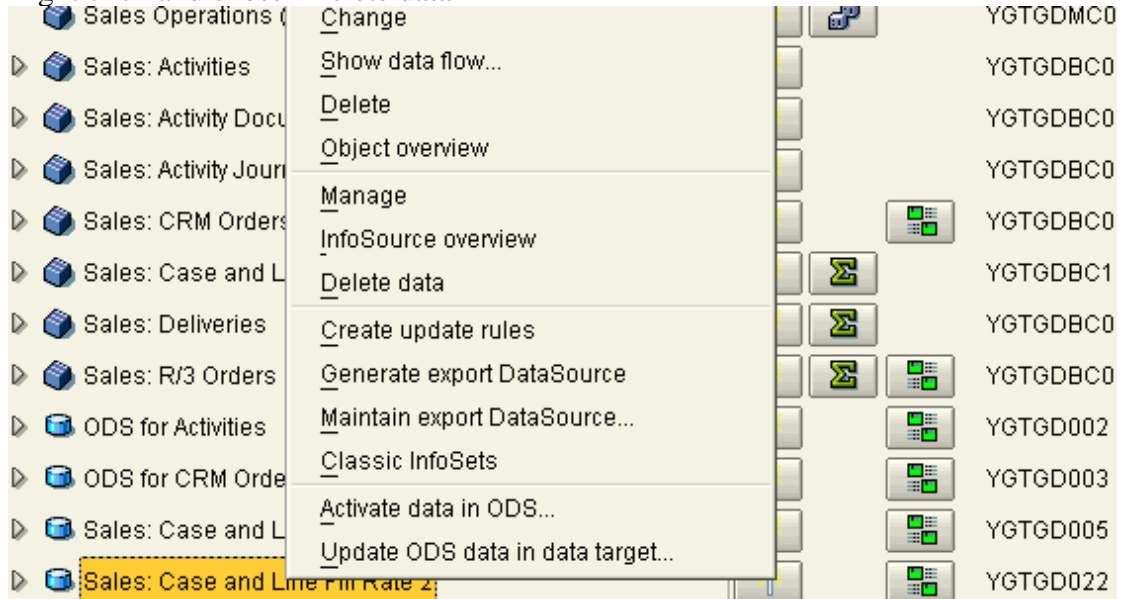

ODS YGTGD046 is feeding ODS YGTGD022

ODS YGTGD033 is feeding ODS YGTGD005

1. We have to delete data first from YGTGD022/ YGTGD005

Make a search ODS 22

Right click and chose "Delete data"

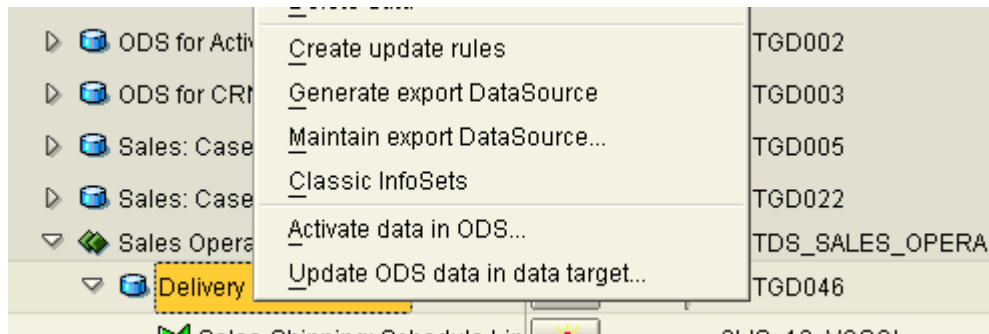

Click Yes

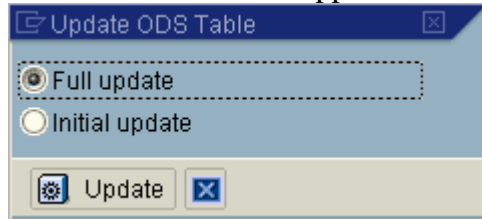

Once you delete data

Make a search of ODS 46

Right click and chose "Update ODS data in data target"

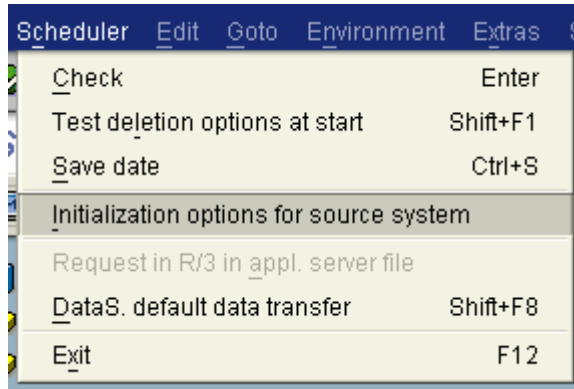

The little window will appear

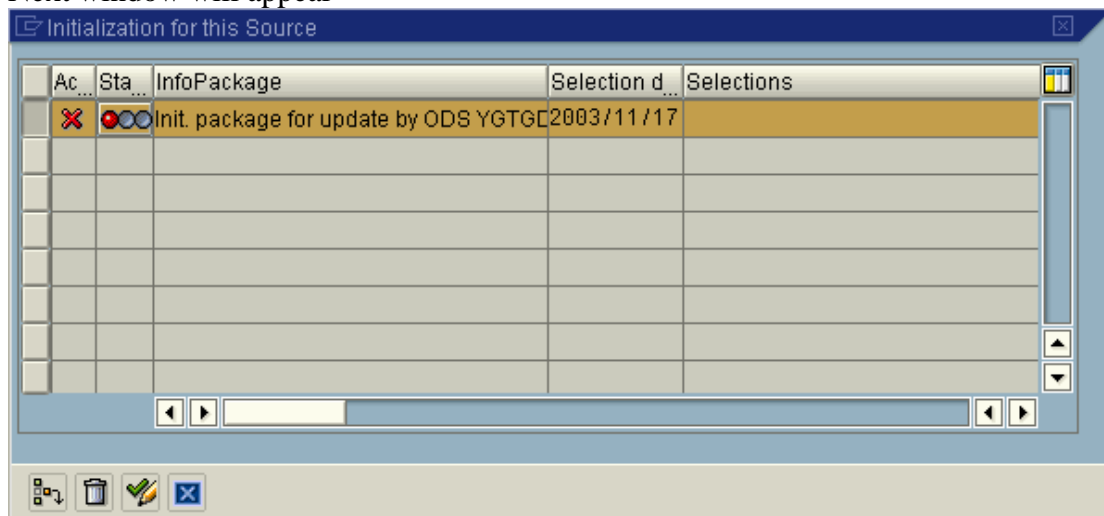

Chose "Initial update" and hit "Update" button

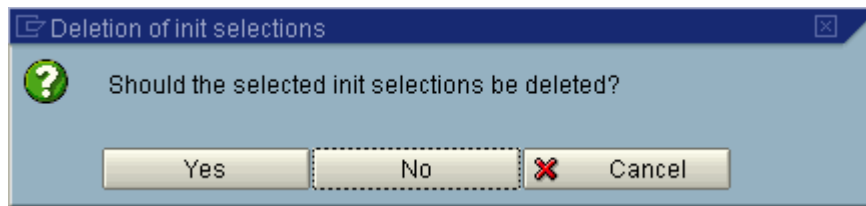

Go to "Scheduler" menu and chose "Initialization options for source system"

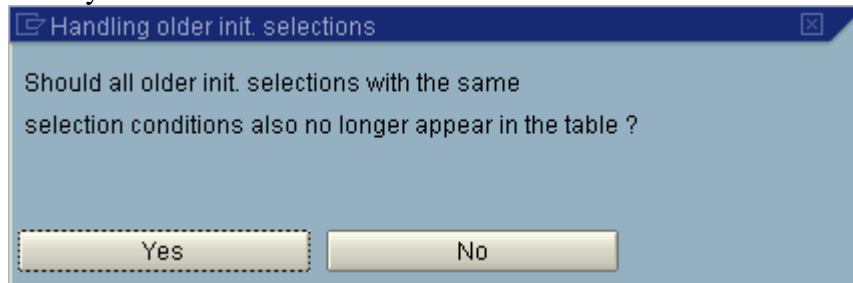

Next window will appear

Click in the record in red and hit the trash icon to delete it

Click yes

Click yes

Go to schedule tab and click "Start" button
