

# How to activate transfer rules for an InfoSource

If you get the error below, you have to activate the update rules for the InfoSource

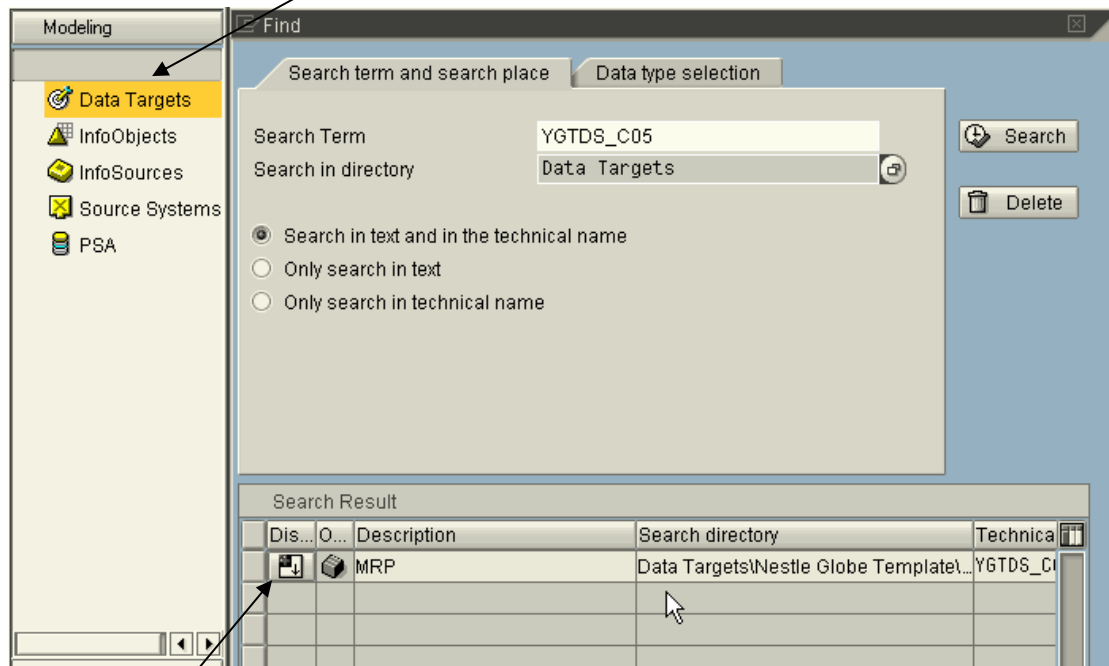

Start by opening the system with TCODES SCC4 and SE03

Once the system is open, Click on the InfoPackage (IP) which needs the update rules activated. Click on the header tab and copy (ctrl+c) the data target

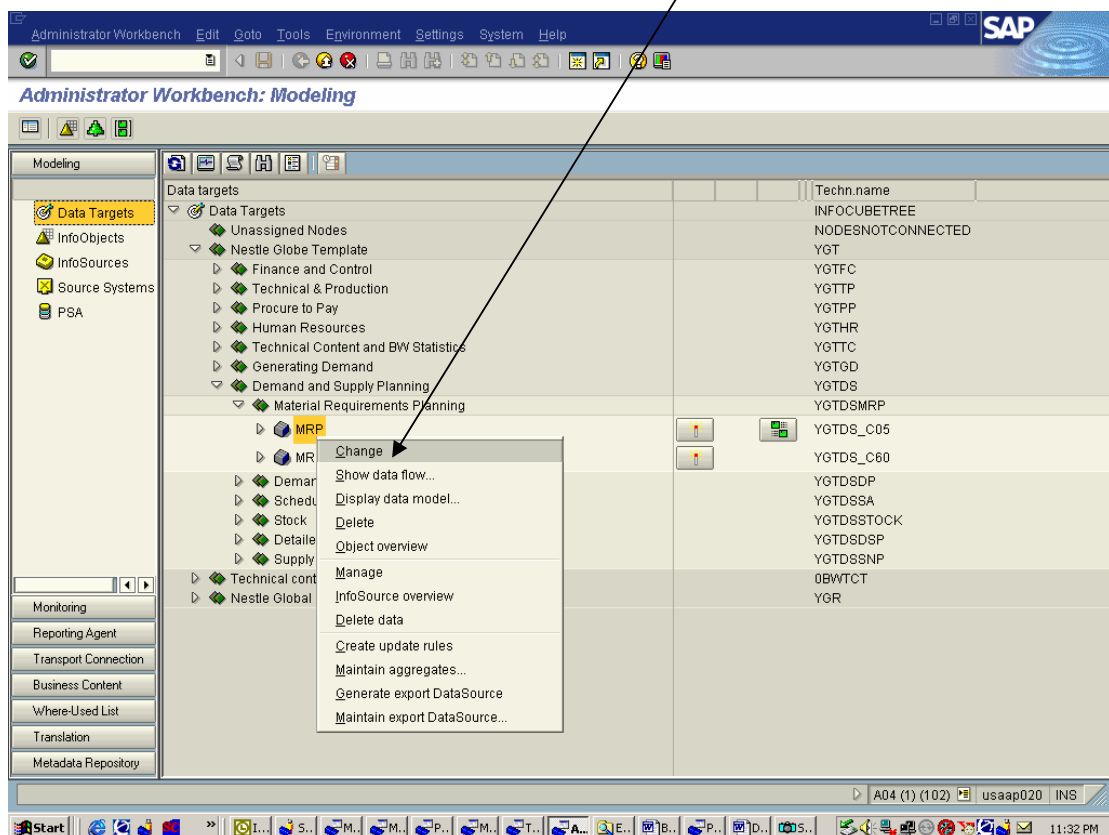

Header	Status	Details
Request	REQU 3P6DTEM9XK1JTN8L57XIELMW3	
Start Time	17.04.2003 02:30:36

Update	YGTDS C05	
Data Targets	YGTDS C05	
Processing	Not in PSA, but in data trgts...	
Update Mode	Full update	
Posting Method	Never update transaction data...	
Character Check	Switched off	

From Modeling, click on Data Targets and do a search for the data target (ctrl + v)

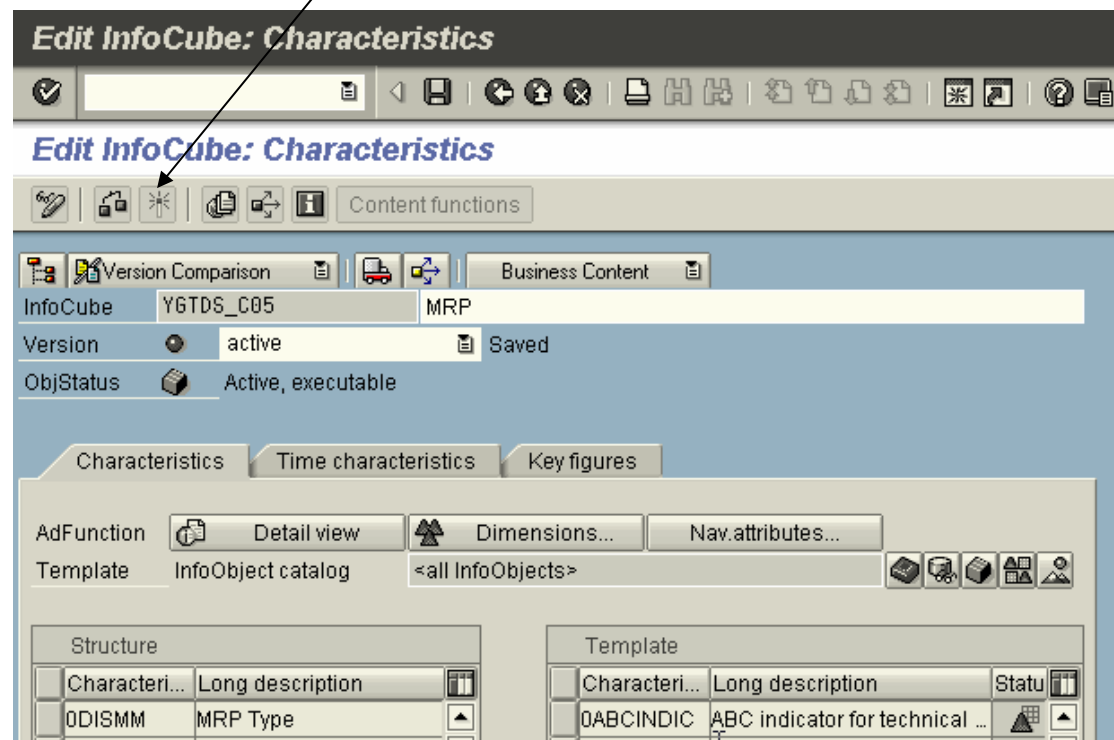

Click here

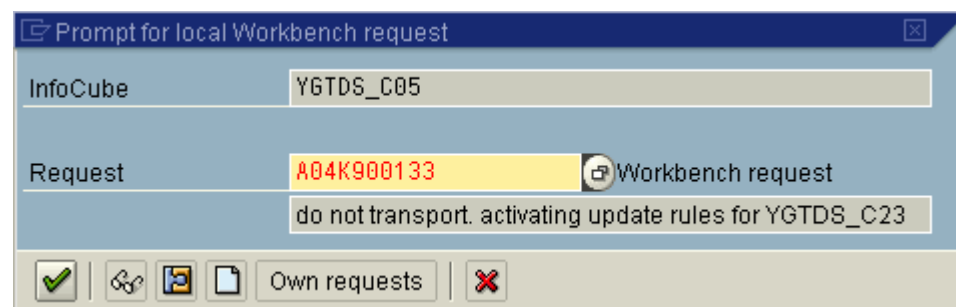

Right Mouse click on the data target and select Change

Click on the activate button

Note: The system might ask you for a workbench request. If this happens create a dummy workbench request and proceed.

Once the update rules are activated. Make sure to

- 1) Close the system
- 2) Re-run the IP
- 3) Delete the dummy workbench request using TCODE SE10
