

IP: 1_CO_PA0011 Delta, Processing is overdue.

Infopackage: 1_CO_PA0011 Delta

Error: Processing is overdue

1. In the monitor, on the right side click the Details tab.

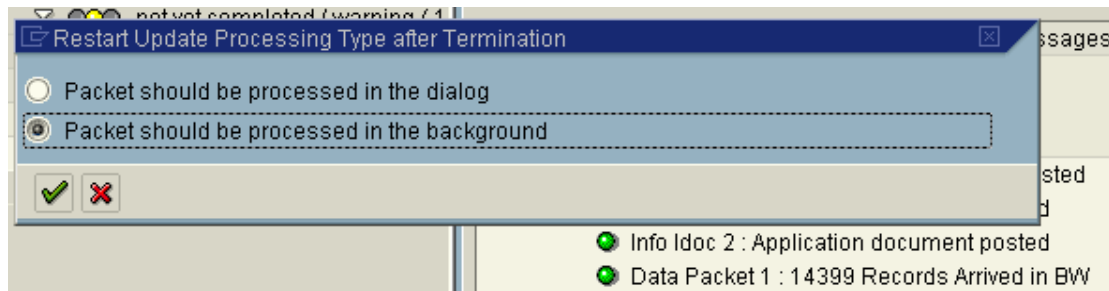

2. In the Details tab, there will be few Data Packets in red. They are required to be reprocessed.

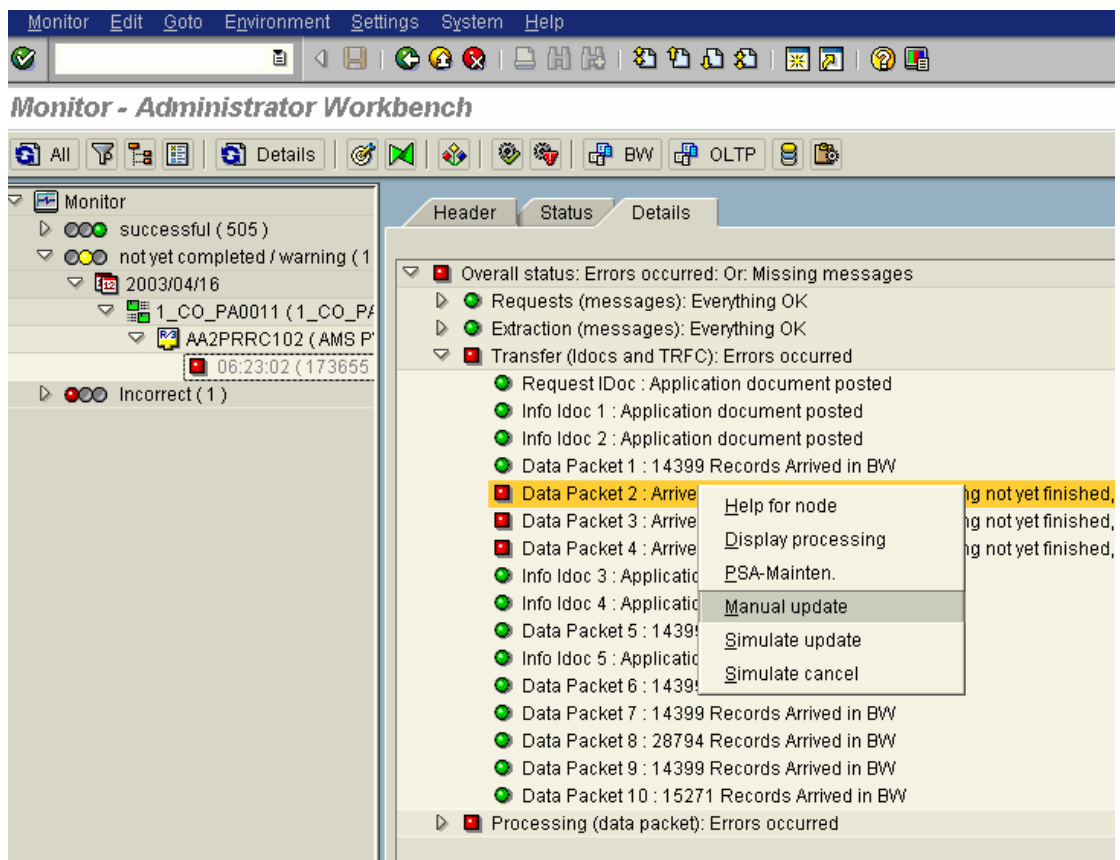

3. To define the reprocessing as a background job, click Edit on Menu-> Init update ->Setting for further update

4. Click Packet should be processed in the background.

5. In the Details tab, select the red data packet and right mouse click and select Manual update.

6. 'Background processing successfully scheduled' will be displayed on the status bar.

7. Repeat step 5 on all the red data packets. Different background processing will be scheduled for each red data packet.

8. When all red data packets become green, reprocessing is done.

9. To trigger rollup to aggregates, follow the steps below:

tcode = SM64

name = YIPG_GTFC_TRANSACTION_DAILY

parameter = DLYCOPAFIN

click Trigger.

Trigger Event in Background Processing

Event

Name YIPG_GTFC_TRANSACTION_DAILY

Parameter DLYCOPAFIN

Trigger

10. Event YIPG_GTFC_TRANSACTION_DAILY successfully released!

11. Rollup job will get triggered.

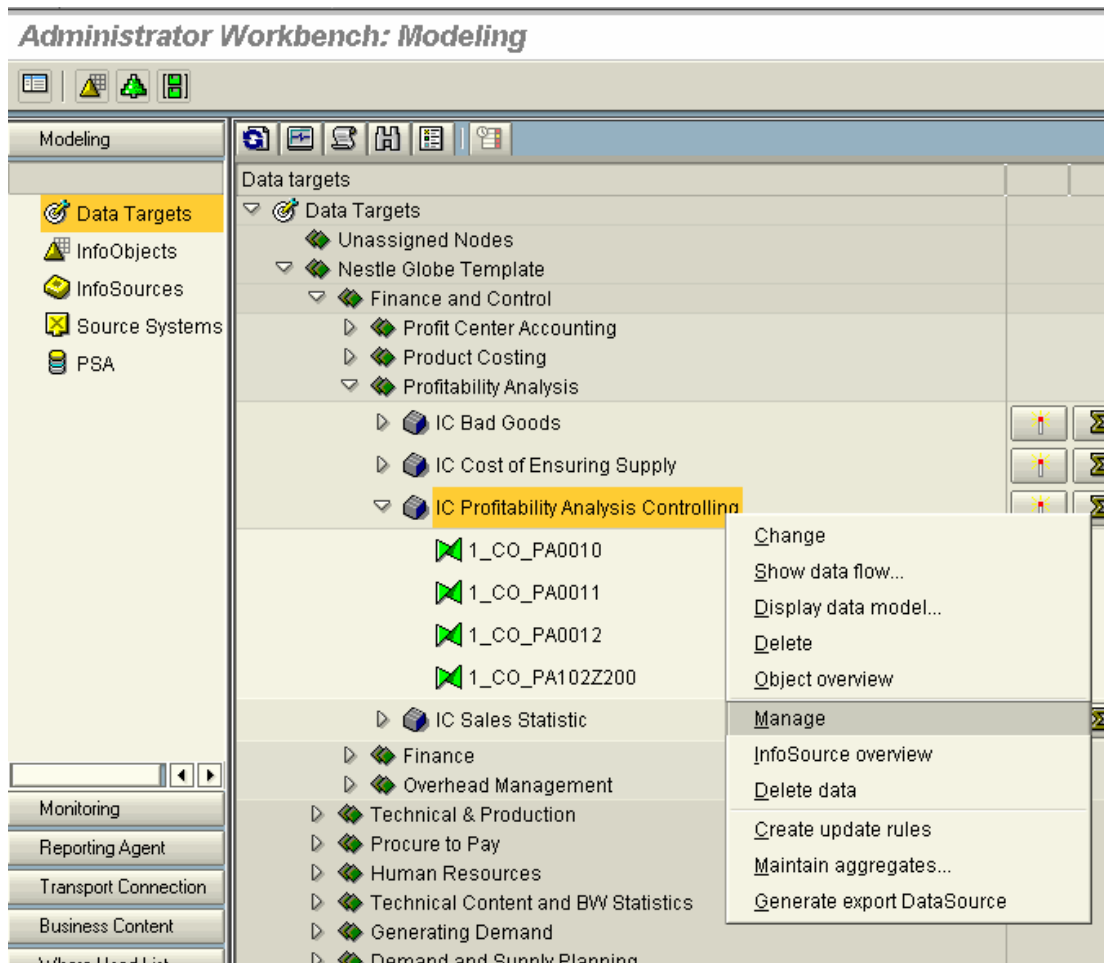

12. Ensure that aggregates are loaded successfully.

Tcode = rsa1

Click Data Targets

Find infocube 'YGTFCPA01'

Right mouse click, select manage.

13. Rollup Status Column should have green check for all requests.
