

## How to reprocess a failed request II (update from PSA)

Click the failed request, and go to the header tab

Next double click on the data target

Go to the **Requests** tab and delete failed request.

The screenshot shows the 'Manage Data Targets' dialog box in SAP. The 'Requests' tab is selected, displaying a list of requests for the 'InfoCube:Sales: Orders(YGTGDBC02)' target. The table below shows the details of these requests.

Name	D...	Technical name	Table type
Sales Orders for Demand Planning		YGTDS_C01	InfoCube
Sales: Orders		YGTGDBC02	InfoCube

  

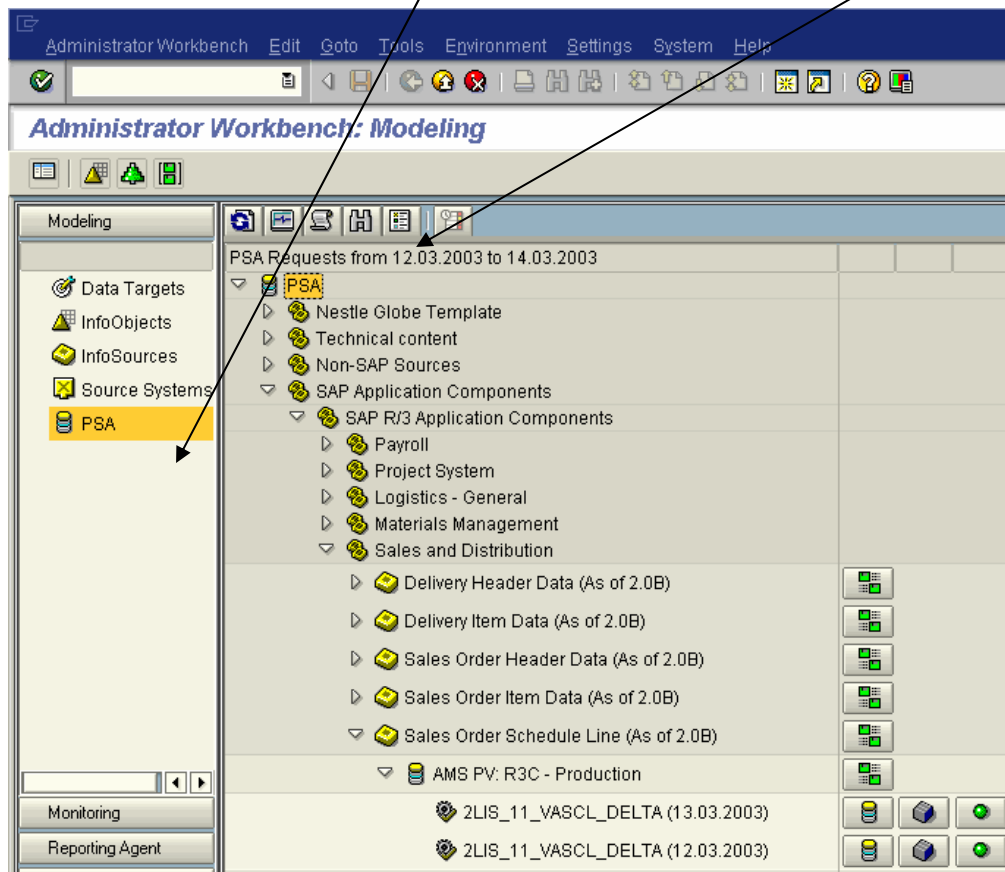

Requ...	R...	C...	R...	QM...	Te...	Dis...	InfoPackage	Request d...	Update date
75636							2LIS_11_VASCL_DELTA	13.03.2003	13.03.2003
75151							2LIS_11_V_SCL_DELTA	12.03.2003	12.03.2003
75144							2LIS_11_V_ITM_DELTA	12.03.2003	12.03.2003
75140							2LIS_11_VAITEM_DELTA	12.03.2003	12.03.2003
75133							2LIS_11_VAHDR_DELTA	12.03.2003	12.03.2003
75113							2LIS_11_VASCL_DELTA	12.03.2003	12.03.2003
74625							2LIS_11_V_SCL_DELTA	11.03.2003	11.03.2003
74623							2LIS_11_V_ITM_DELTA	11.03.2003	11.03.2003

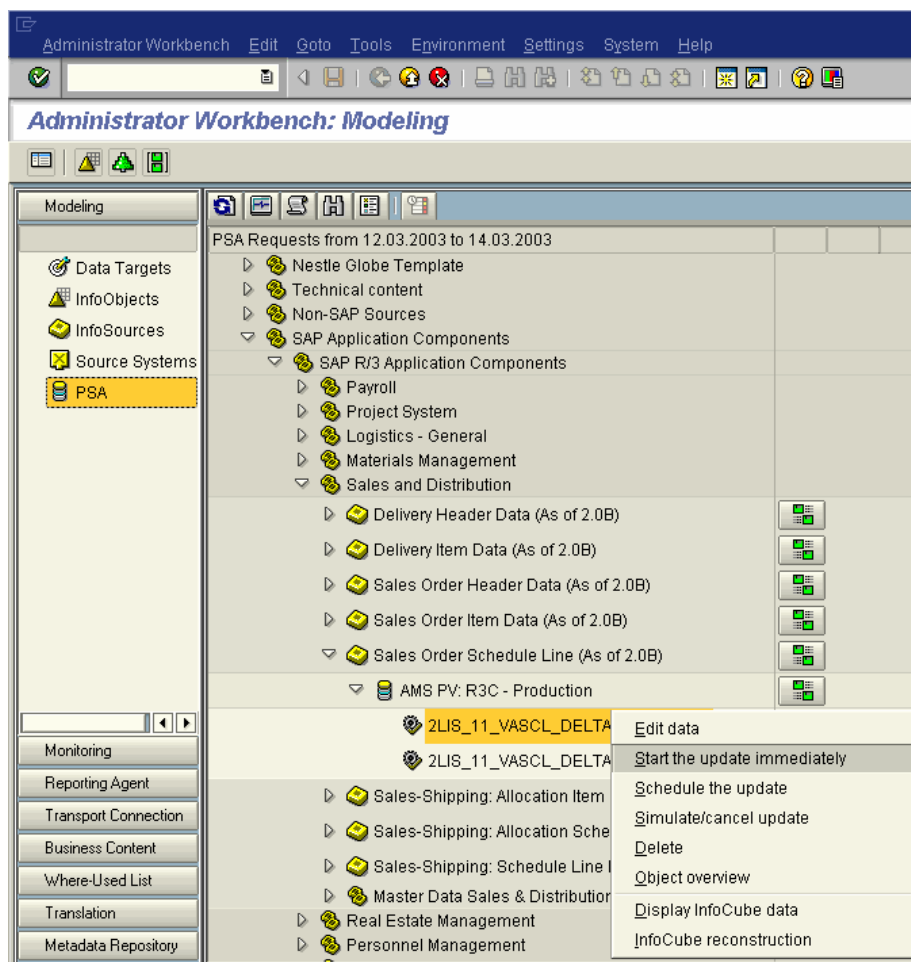

Request Display: From date of the update 20.02.2003 To 14.03.2003  
Job Name BI\_DELR Selection SubseqProcessing  
Delete

**Note:** You must delete the bad requests from **all data targets**

Exit the monitor and click on **PSA**. Next, do a search for the request #.

Right mouse click on the request and click *Start the update immediately*.

A background job will be created to reprocess the request. Refresh and if successful the status will be green.
