

How to push data from PSA to ODS

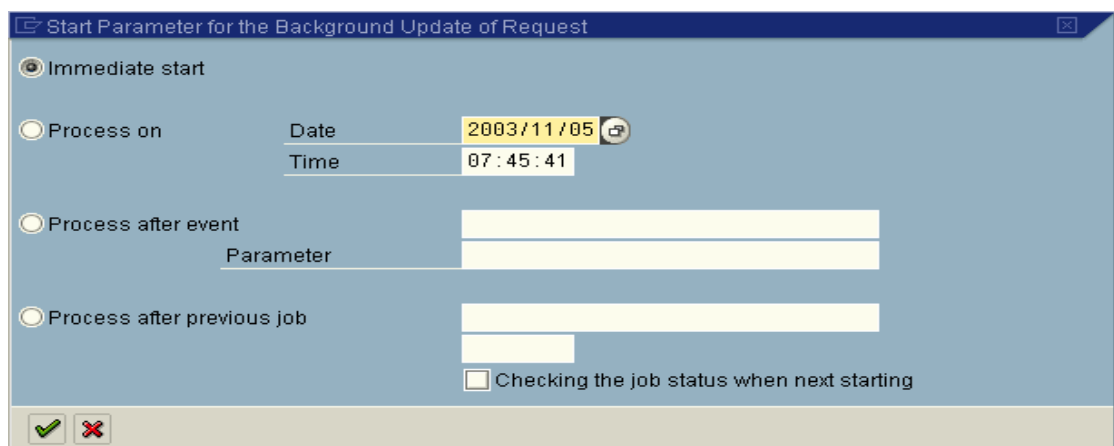

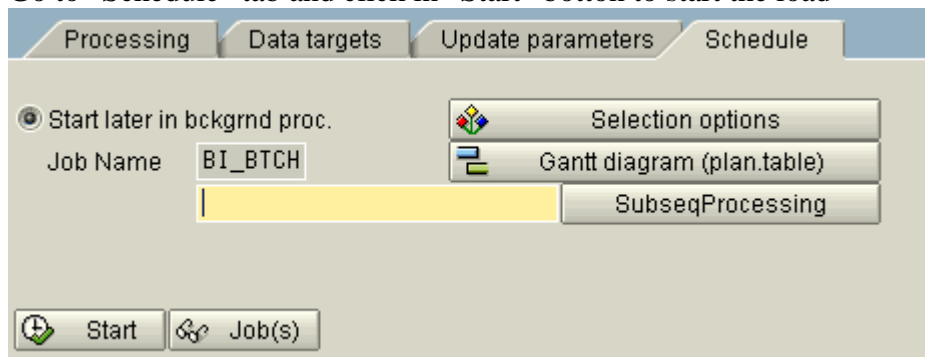

1. Go to PSA
2. Make a search of the IP that you need, for example: 2LIS_12_VCSCS_DELTA
3. Right click and chose "Schedule the update"

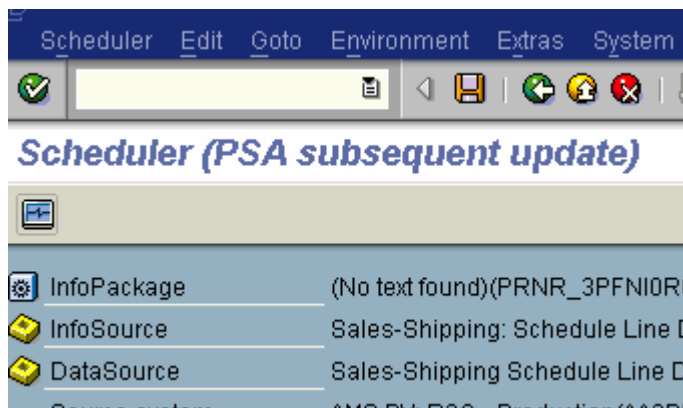

Make sure the data target is selected in the "Data targets" tab

Go to "Schedule" tab and click in "Start" button to start the load

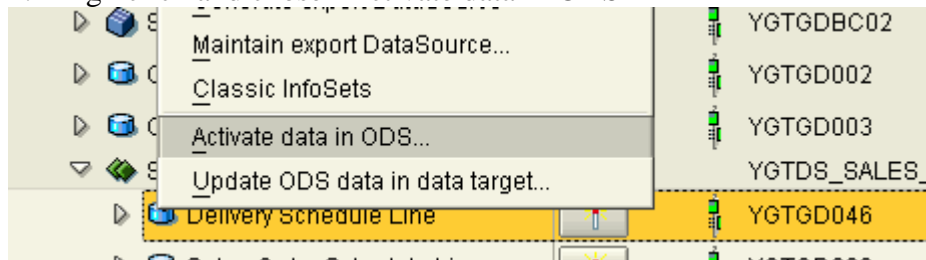

Click in the green arrow to continue

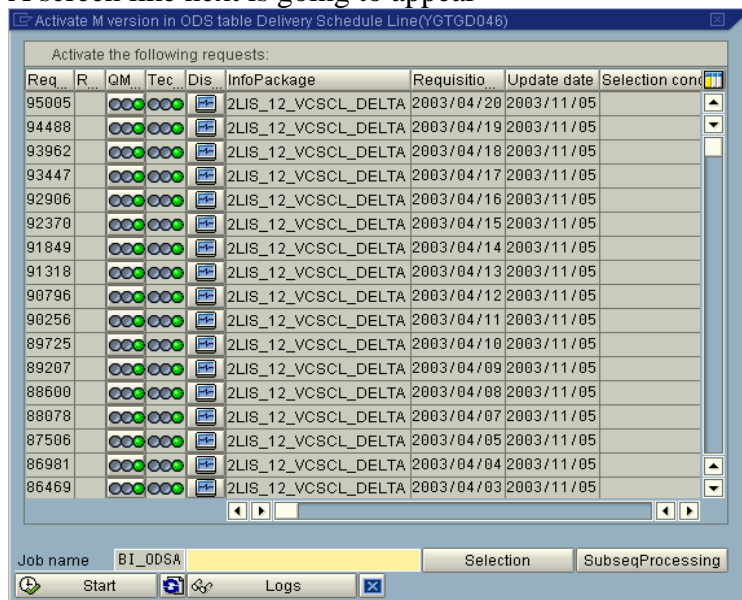

Click in the back green arrow and continue with the next request, following the same procedure.

Once you finish, don't forget to activate data in ODS:

1. Make a search of the ODS
2. Right click and chose "Activate data in ODS"

A screen like next is going to appear

Click the "Start" button and close the window

A Background job is going to be schedule for this.
